

Gravity Maze Challenge Tracker & Invent-Your-Own Maze Sheets

A free bonus from ZoxDeal — track all 60 challenges, then design your own mazes.

How to use this tracker

1. Work through the cards in order: Beginner (green), Intermediate (orange), Advanced (blue), Expert (red). 2. Mark each card solved, stuck, or skipped — and note the trick that cracked it. 3. When a marble run fails, check the towers first: a wobble can look like a wrong solution. Re-seat every tower firmly before you change your design. 4. Use the blank grids at the end to invent your own mazes: draw the grid, mark the start and target, list the towers allowed, then test it with a friend.
