Corner Lamp Placement & App Setup Guide

A ZoxDeal bonus for Oiyn Corner Floor Lamp buyers

Five minutes of setup beats an hour of fiddling. Work top to bottom, check each box.

PLACEMENT (do this first)

- [ ] 1. Pick a TRUE corner: two walls meeting at roughly 90 degrees.
- [ ] 2. Leave 2-4 inches of clearance from each wall for the light wash.
- [ ] 3. Put it near an outlet - the power cable is short.
- [ ] 4. Keep it out of main walkways; the base is only 7 inches wide.
- [ ] 5. Face seating toward the corner so the glow lands behind you, not in your eyes.

APP SETUP (5 minutes)

- [ ] 6. Install the Oiyn app and pair the lamp before mounting anything.
- [ ] 7. Run the brightness calibration: 100% first, then dim to taste.
- [ ] 8. Save 3 go-to scenes: warm white (evenings), color cycle (weekends), dim amber (movie night).
- [ ] 9. Set a sleep timer so it turns itself off after you fall asleep.
- [ ] 10. Test the remote too - it covers power, brightness, and basic scenes without your phone.

MUSIC SYNC THAT LOOKS GOOD

- [ ] 11. Place the lamp within 10 feet of your speaker for the cleanest beat detection.
- [ ] 12. Start with the 'rhythm' effect at 60% brightness - full blast looks chaotic.
- [ ] 13. Lower room lights first; sync looks best in a dark room.
- [ ] 14. For gaming, use a slow pulse scene instead of beat-reactive - less distracting.

QUICK TROUBLESHOOTING

- [ ] 15. Lamp not responding? Unplug 10 seconds, then re-pair in the app.
- [ ] 16. Colors look washed out? Move it closer to the walls - distance kills saturation.
- [ ] 17. Remote dead? Check the battery tab and re-seat it.
- [ ] 18. App can't find the lamp? Make sure no other phone is connected to it.
